

## Avira Antivirus for Endpoint

Rock-solid protection for PCs  
and servers, advanced  
technology, and  
is extremely easy  
to administer

### Maximum protection against malware – top performance

#### Real-time threat prevention

Signature-based detection, heuristics analysis, and cloud-based scanning offer complete protection against malware.

#### On-access/ on-demand protection

Real-time cloud technology protects active processes, file retrievals, and system memory against spyware, rootkits, and hidden malware.

#### Network Protection

Avira prevents malware from being stored or spread by your internal network or cloud-based storage solution. In addition, all network traffic to your endpoints is scanned in real time.

#### Anti-ransomware

Each month, Avira blocks over a million ransomware attacks, preventing ransom demands of over 600 euros per attack. Our unique security technology stops ransomware before it can unleash its damage.

#### Advanced Web Protection

Phishing, drive-by-downloads... – it's easy for employees to call up infected websites and cause immense damage. Avira rules out this risk.

#### Intelligent Repair System

Best-in-class technology that repairs damage and undoes changes caused by malware to your files and registries.

#### Self-Defense

Prevents malware from altering or even disabling your antivirus protection.

#### Resource-light

Even when the powerful antivirus technology is active, your servers will keep performing at their best when the processing load is high.

Looking for a smart, resource-light security solution? There are many good reasons to choose **Avira Antivirus for Endpoint**: It's easy to install this award-winning software, there are zero maintenance costs, and the protection it provides means you're fully protected 24x7.

The Avira Endpoint bundle utilizes the latest detection technologies: PC and file servers (endpoints) are safe from zero-day attacks, advanced persistent threats (APTs), and malware such as viruses, banking trojans, and spyware, as well as many other threats on Windows. It provides your IT network with the top protection you need at an extremely competitive price, increasing your security while saving you money.

### Included in the bundle

#### Avira Antivirus Pro – Business Edition

Protects all your desktop PCs, laptops, and netbooks against viruses and malware.

#### Avira Antivirus Server

Protects your business and customer data from malicious attacks without hogging your system's resources.

#### Free updates and upgrades...

...for the entire term of your license.

## Avira Antivirus for Endpoint

Rock-solid protection for PCs and servers, advanced technology, and is extremely easy to administer.
