

Dynamics 365 for Energy

Dynamics365 for Energy initiative started in 2011 by Data Communication.

Based on Dynamics 365 platform, Dynamics 365 for Energy is a 360° software solution for the Electricity and Gas industries, incorporating innovative features and specialized functionality to fully meet the Sales, Marketing & Service needs of energy companies, whether they are energy suppliers or network administrators. At the same time, it is a fully customizable solution.

Distinguished for advanced specialized technology in **Greek IMPACT BITE Awards** (Gold Award 2018 & Bronze Award 2016)
